**Is your Gas Meter's regulator iced up?**

It could slow or stop your gas supply

Take a close look: the regulator is the disk on the gas pipe, just to the left of the meter.

During the winter it is important to keep snow and ice from building up and covering your gas meter and pressure regulator.

Melting snow from a roof, drifting snow, freezing rain or water leaking from a gutter can cause an icy build-up.

This build-up could interrupt your gas service or cause the appliance to malfunction, which may create a hazardous condition.

**Recommendations:**

- Use a broom to gently clear snow or ice around your meter.

- Be careful not to hit the meter with your shovel or plow. Don't kick or hit the meter, regulator or piping to knock off snow or ice.

If your gas stops flowing, and there is ice covering your regulator (the big round disk on the pipe leading into the meter), give us a call at 715-425-6177.

**Budget Bills adjust next month**

Are you on our Budget Plan? If you are, your payment is changing next month. Please check your March bill to see the new amount.

Each winter, we adjust your fall budget payment amount to reflect actual usage and actual costs to date, This has been a warmer than normal winter, so your budget payment may be lower than before.

Your new Budget amount will stay the same until summer.

In July we will review all customers' budgets and make any final corrections. If you have credit, you can apply it toward your budget for the next heating year (August—July). Or you can request a refund.
