## SAVE WHEN YOU PURCHASE, KEEP SAVING EVERY DAY

### DID YOU KNOW?

The average household spends about \$2,000 a year on energy costs. Appliances and electronics account for about 30 percent of that amount. To choose products that offer energy efficiency without sacrificing features, performance or comfort, just look for the ENERGY STAR® label.

Focus on Energy has partnered with ENERGY STAR and participating retailers to make these high-performing, high-quality products more affordable. That means you'll save on your purchase, you'll save year after year and you'll help save the environment by reducing greenhouse gas emissions.

To start shopping and comparing the benefits, features and pricing of products at participating retailers, visit [focusonenergy.com/appliancemarketplace](http://focusonenergy.com/appliancemarketplace)

\*Some programs require that a resident must be a customer of a participating natural gas AND electric utility. Find out if your electric utility participates at [focusonenergy.com/utilities](http://focusonenergy.com/utilities).
