River Falls, WI 54022
(715) 425-6177

JANUARY 2018

Due Date:
January 25,
Thursday

Your payment is on time if it is received on the due date by closing time at our payment locations. Mail in time to meet this date or drop your payment at:

River Falls Location:
Our office, 415 S. 2nd Street.
Due date deadline: 5 p.m.

Prescott Location:
First National Bank,
1151 N. Canton Street.
Due date deadline:
lobby - 5 p.m.,
drive-up window - 6 p.m.

Online bill payers:
allow 10 business days for
your payment check to reach
us to avoid late fees.

ONLINE: Visit us at
www.stcroixgas.com.

You can click through to pay by credit card or check with Payment Service Network. Or call PSN at 877-885-7968.

There is a \$3.99 transaction charge.

Or... AutoPay is free and automatic each month—details on our website. Pair it with Budget Plan to make your gas bill payment amount predictable.

Our Due Date is NOT necessarily the same as RFMU!
Watch our left column for our due date each month. It is normally the 25th, but will be later if the 25th falls on a weekend or holiday.

Carbon monoxide (CO) is an odorless, colorless gas formed by the incomplete fuel combustion in an engine, furnace, or stove. Vehicles, camp stoves, charcoal grills, fuel-burning lanterns and generators can produce CO. Breathing CO in high enough concentrations will lead to death.

When people become sick the symptoms are similar to the flu, which can cause victims to ignore the early signs of CO poisoning.

The good news is that carbon monoxide poisoning can be prevented with simple actions such as installing a CO alarm, warming up your car outside your attached garage, and maintaining your fuel burning appliances.

The federal standard for safety is 9 ppm (parts per million) for an 8 hour period. At higher levels, your CO alarm will sound once the elevated level has been sustained over a certain period of time. If your CO alarm sounds, leave your home and call your local fire department to confirm.

Your natural gas furnace should be inspected every two years. Watch for excess moisture on windows, walls and cold surfaces. Watch for rusting on flue pipes. The natural gas flame should be blue, not orange or yellow.

Your natural gas furnace should be inspected every two years. Watch for excess moisture on windows, walls and cold surfaces. Watch for rusting on flue pipes. The natural gas flame should be blue, not orange or yellow.

Wish you could have proof that your new home is more energy efficient, comfortable, durable, and safer than the typical home built in Wisconsin? That's exactly what you get with Focus on Energy's New Home Certification Program.

You can rest easy knowing your home is inspected at least twice by a third-party energy expert to ensure Program standards for optimal energy efficiency are met.

DID YOU KNOW?

On average, Certified New Home owners save about \$600 per year on their utility bills!
